

# NAX Motorcycle Rider Training

## Basics Revision + Advanced

This course is designed for those who are looking to gain more confidence before heading out on the road. If you felt the pre-Learner course was a bit too fast paced, and you want to learn more skills, this is the course for you. By the end you will be comfortable in handling a motorbike enough to go out on the road or for a test ride to buy your new bike.

On this course: We will go over the aspects of the pre-Learner course and also introduce you to more advanced skills and techniques. We cover learning to start and take off comfortably and with confidence, turning, gear changing and higher speed gear changing, slow speed control and other advanced techniques that will get you comfortable to manoeuvre the bike in all situations. Riders who do this course find themselves just about ready to pass the MOST.

Our courses are run on a **1 to 1** basis so you get our full attention. You are not rushed or hampered by other riders being at different skill levels. We take an in-depth look at your riding in a very personal and professional manner.
